:

The move to the new office took 12 hours and 3 trips last Wednesday 7/1/20, after much pre-moving preparation. Former space was swept and mopped after everything was moved out (should get our deposit back). Desk and computer have been set up so work can be done. Much construction work is still being done in the new building. Richard and Eileen will be going to the office at certain times to fill some orders. The storage space has been rearranged to be more functional and set up the computer. Printer still needs to be set up. Thank you to all of members that came out to help get this move done,

I have reached out to the new Landlord about the possibility of us moving into one of the other offices that are currently unoccupied. Waiting for a response, until then we will continue to operate out of the space that we have our items stored in.
